Appendix – Important information

Approval provided through this letter only evidences the reprocessing aspect of the technical recyclability of this packaging material and does not guarantee a 'Recyclable' outcome. A recyclability outcome may also be impacted by other aspects such as dimensions, weight, format, printing, product contamination, new secondary materials or any other modifications. For this reason, brand owners who receive a Fibre Submission letter from Pac Food Pty Limited are responsible for subsequently accurately assessing the entire packaging format or SKU in PREP, including secondary materials and separable components. Where the format or SKU no longer meets the recyclability thresholds of the program due to secondary materials, components, or size, the 'Recyclable' ARL is no longer applicable.

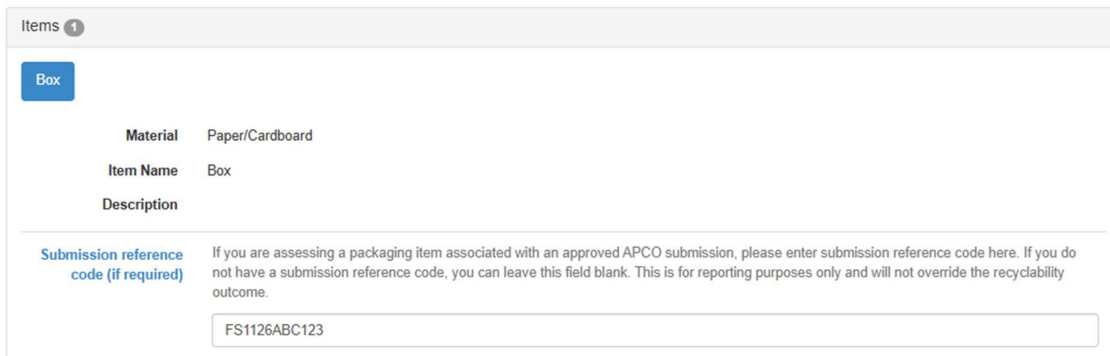

APCO reserves the right to rescind a submission at any time, should new information arise. In such cases, APCO will work with Pac Food Pty Limited and APCO Members to facilitate a transition of on-pack ARLs appropriately.

Instructions for use

For audit purposes, you must keep this statement as evidence of approval for the specified SKU/material/format(s). This statement does not grant a blanket 'Recyclable' for any other packaging materials manufactured for or by Pac Food Pty Limited.

Completing a PREP report

As the brand owner you must complete a PREP assessment and include all relevant packaging details along with the submission reference code. The code can be found in the above approval statement. The screenshot below demonstrates where to enter this code in your PREP assessment.

The screenshot shows a web form for a PREP assessment. At the top, it says 'Items 1'. Below this is a blue button labeled 'Box'. Underneath the button, there are three fields: 'Material' with the value 'Paper/Cardboard', 'Item Name' with the value 'Box', and 'Description' which is empty. Below these fields is a section for the 'Submission reference code (if required)'. It contains a text box with the code 'FS1126ABC123' and a small explanatory text: 'If you are assessing a packaging item associated with an approved APCO submission, please enter submission reference code here. If you do not have a submission reference code, you can leave this field blank. This is for reporting purposes only and will not override the recyclability outcome.'
